

WHO WE ARE

Dental Robotics is bringing a new type of toothbrush to the market that brushes all your teeth at the same time. The toothbrush is specifically designed for the elderly, making brushing teeth fast and effortless. This brings daily brushing within reach of millions whose teeth are rarely brushed.

WHAT WE OFFER: INTERNSHIP PRODUCT DESIGN ENGINEER

We offer the full start-up experience: immense challenges, great responsibility, and intense growth – business wise but also personally. And just as important: we offer you the opportunity to work on solving a serious problem and improve the lives of millions. We help you to grow in becoming a product design engineer. In this internship you will learn:

- Bring your CAD skills to the next level (Solidworks);
- Rapid prototyping on steroids: 3D printing (SLA & FDM), thermoforming, injection moulding;
- Manufacturability mindset: Bringing products to mass production;
- Get full responsibility within the team;
- The full start-up experience: work within a dynamic fast moving engineering team.

THE INTERNSHIP

We are looking for WO/HBO students, both Bachelor and Master. We offer a fulltime internship, preferably one semester, starting from next semester (February 2021 or later).

RELEVANT INFO

Yes, we do have a reimbursement. If you are a no-nonsense and hard-working person with fun spirit and humor you might be the right person for us!
