

## *Internship (graduation) Industrial Designer*

uPRAX Microsolutions is an ambitious young startup in the top technology incubator in Europe YES!Delft. We have made it our mission to make every person on earth immune to all vaccinatable diseases. To achieve this mission we use a new technology named microneedles, which are a miniscule version of normal hypodermic needles which the patient can apply themselves.

We are located in the High-Tech accelerator YES! Delft. This is an incubator with several start-ups in the field of technical innovation. The versatile and inspiring atmosphere allows you to broaden your network while discovering your design preferences. Because we are a young company you have a lot of responsibility and input. All competences are covered!

We are looking for interns to strengthen our team on design engineering.

### **Responsibilities:**

- Prototyping (designing and engineering test setups)
- 3D printing (validating new applicator ideas)
- Research (validating user experience)

### **Traits we are looking for:**

- Academic research mindset
- Technical
- Independent

Do you want to experience the atmosphere at YES! Delft, do you find entrepreneurship interesting, do you want to help vaccinate every person on earth and make a real impact? Then contact us!

Send an email with your (short) motivation and portfolio to: [maarten.smit@uprax.nl](mailto:maarten.smit@uprax.nl)
