

# SMART FLOOR

Smart Floor is looking for new interns to further develop the wearable used in its innovative product called 'Smart Floor'. This wearable delivers a diverse range of information to sport coaches and healthcare workers; position of the feet, speed, acceleration and other advanced indicators like risk of falling, fall detection,...

Smart Floor is a young company which is active in both health and sport markets. More information can be found on our website: [www.smartfloor.com](http://www.smartfloor.com)

The student will work on different areas depending on his/her interest and ideas:

- Production/Upscaling improvements of the design: 3D printing/injection molding, replaceable battery, ...
- Improve design for elderly in practice: wearable acceptance (color), ...
- Prototype the sport design and gather feedbacks, ...

The student will work in a multi-disciplinary team using brand new technology: wearable design, 3D printing, flex material (TPU), cloud IoT platform,...

We are looking for a HBO/WO student able to:

- work independently and in a team
- be open for innovation
- be good at what he/she does
- be motivated

We offer:

- Time to learn
- Freedom
- A nice and open work atmosphere
- A good daily lunch

Interested? Send your resume to Peter Meijer: [peter@smartfloor.com](mailto:peter@smartfloor.com), or leave your contact details on our website: [www.smartfloor.com](http://www.smartfloor.com)
