

WANTED: NEXT-LEVEL DESIGN INTERN

We are SETLR

SETLR is a new initiative of architectural office Woonpioniers and startup Archiyou. Our mission is to **democratize knowledge of eco-design and making**: from furniture to building elements and homes.

We believe that **open and customizable design** is essential to fit client desires, local constraints, materials and ways of production all over the world. That's why we developed **unique technology** to publish parametric designs online in configurators and generate all information needed to start making it or have it made.

We call this open source design.

We are looking for someone special

Are you passionate about ecological design, parametric design and making? Are you mission-driven and want to maximize the impact of design? Do you like technology and are not afraid to think outside the box, learn new skills and invent? Then we are looking for you!

Passions and skills: eco-design, generative design, parametric design, crafts, prototyping, digital fabrication, 3d printing, innovation, digital technology

What we offer

Work closely with the founders of SETLR to develop the mission and strategy. Then design a collection of parametric designs, develop real prototypes and implement them on our online platform.

Location: Woonpioniers HQ in Amsterdam-West (hybrid work also possible)

Internship duration: 3-6 months

Starting: as soon as possible

Salary: 750 EUR per month for 36 hours per week

Hiring process

Please send us a short email intern@setlr.design that explains why you are interested in SETLR, when you want to start and attach your portfolio. For specific questions call us +31 6 83702641. We'll reply within a couple of days or faster! Looking forward to meeting you!

- Daniel Venneman (Woonpioniers) and Mark van der Net (Archiyou)
