

# FINAL STUDY PROGRAM FORM

## MASTER PROGRAM

For students who started in/after September 2021

Name student (Surname, Name):	
TU/e email address:	
Student number TU/e:	
Date:	

At Industrial Design you can define your own study program. The study program consists of some mandatory components and various options to choose from. With this form you confirm your final study program choices for both the mandatory and optional components.

For all project and course codes mentioned on this form, you will need to register yourself via Osiris. You can find all study components in the Osiris Course Catalogue: <https://tue.osiris-student.nl/#/onderwijscatalogus/extern/start>

Deadlines for registration are mentioned in the year planning. To graduate, it is your own responsibility to fulfil all components of the program. For more information on graduation, check the online Education Guide and the PER.

### TRACK

Please indicate which Track you choose for your Master Program:	
---	--

### EXPERTISE AREAS

As part of your Master Program, you specialize yourself in Design and Research Processes (DRP) and two other expertise areas.

Please indicate which two expertise areas, next to DRP, you choose to specialize in.

Please indicate your first chosen Expertise Area:	
Please indicate your second chosen Expertise Area:	

### GRADUATION MENTOR

Please indicate your preferred Graduation Mentor. This person will be your mentor and project coach for your upcoming semesters. Please note that a PhD's candidate cannot be a Graduation Mentor. The Graduation Mentor will need to agree to this role by signing this form.

Please select your Graduation Mentor:	
In case you select the 'Other' field, write down the name of the mentor:	

### PROJECTS, COURSES AND ELECTIVES

The generation of students who started after September 2021 must complete the following projects as part of the master program:

- DPM115 Project 1 Design (15 ECTS)
- DPM120 Project 2 Design Research (20 ECTS)
- M21 Option (20 ECTS) (Indicate your choice below)
- Final Master Project (30 EC)

For all study components, you need to register via Osiris.

### DOUBLE DEGREE

In case you are doing a Double Degree, your program might look different.

Indicate below if you are doing a double degree and with what department.

Double Degree:	
Department:	

## M21 OPTION

Select your chosen M21 Option:	
Select the semester you intend to start the M21 Option:	
Do you go abroad (Preparation FMP abroad or Exchange):	
In case you intend to go abroad, and this might not be possible given the circumstances, select your second choice M21 Option:	

### Notes:

- An International Exchange requires a nomination procedure of more than six months. Contact the Exchange Coordinator [exchange.id@tue.nl](mailto:exchange.id@tue.nl) for more information.
- In case you want to go on an Exchange or go abroad, and you have registered for this in Osiris, and going abroad is not possible given the circumstances, it is your own responsibility to contact CSA-ID via [CSA.ID@tue.nl](mailto:CSA.ID@tue.nl) to change your registration (one week before the semester starts the latest). This is not done automatically.
- Going abroad for your Preparation FMP or for an Exchange gives an exemption of one elective. Register for 'Elective International Experience' to receive this exemption.
- In case you plan to do courses (in total) worth more than 15 ECTS outside the Department of Industrial Design, you need approval from our Examination Committee. Be aware that when you choose the option 'Exchange abroad' or 'Master courses other department/University NL' you immediately reach the 15 ECTS of courses outside the department, and you need approval from the Examination Committee when you would like to do more courses outside of the Department of Industrial Design.

## ELECTIVES + TRACK COURSE

Your program includes the Core Course Constructive Design Research (5 ECTS), a Track Course (5 ECTS) and a total of 5 electives (25 ECTS). Please fill out your preferred courses for your study program below. The credits from additional courses will count as extra-curricular. Note that the offer of electives may vary per academic year.

In case you plan to do courses (in total) worth more than 15 ECTS outside of the Industrial Design Department, you need approval from our Examination Committee. Note: the courses within the options for your M21, 'Exchange abroad' and 'Master courses other department/university NL' will count in these 15 EC as well.

	Course Code + Name	Credits (ECTS)	In Year + Quartile, for example: 1920-GS1
	DCM100 Constructive Design Research	5	
1		5	
2		5	
3		5	
4		5	
5		5	
	Track Course Code + Name	Credits (ECTS)	In Year + Quartile, for example: 1920-GS1
1		5	
Total		35
