

Preparation Graduation Project ES Assessment Form

Department of Computer Science (TU Eindhoven)

Student	
ID	
Course code (2IMC05 or 5T514)	
Supervisor	
Other committee members	

Explanation

After completing the course, the student can perform a literature survey and feasibility study, and make a concrete project description with a detailed project planning.

The preparation graduation project ES is supervised by the graduation tutor and/or graduation supervisor and its objective is to define a concrete Master project. This includes a precisely defined problem statement, an analysis of the state-of-the-art including a thorough literature survey, a description of the expected end result, an outline of the planned research and development approach (possibly already supported by some initial theoretical analyses, a small example or case study, and/or some initial experiments), and a project planning with clearly defined milestones (decision points) and deliverables (results). The student presents the project proposal report to the assessment committee that will also evaluate the Master project.

The preparation project is judged on three criteria: feasibility study, presentation, and report. Each are scored on a number of subcriteria according to the following scale:

- U = unsatisfactory
- S = sufficient
- G = good

The score "sufficient" represents what can be expected from a student. The preparation project is not graded on a numerical scale; the student either passes or fails. If a student fails the preparation project, then the student needs to do a new preparation project with the same or a different supervisor.

The form should be handed in with the student administration by the supervisor when submitting the result.

Assessment of the various aspects of the preparation project

		assessment		
		U	S	G
Feasibility study	problem statement			
	state-of-the-art analysis			
	description of the expected end result			
	proposed research and development approach			
	project planning			
	Explanation:			
Presentation	structure and contents			
	quality of the slides			
	presentation skills			
	Explanation:			
Report	structure and contents			
	clarity of presentation and correctness of arguments			
	English usage			
	general appearance (layout, figures and tables, etcetera)			
	Explanation:
