

KEYNOTE SPEAKER: VINCENT MERK

Vincent Merk has just retired from TU/e after working for 38 years in various positions (senior lecturer in intercultural management, professional skills trainer, teacher of technical French, international relations officer, and Community advisor). He also works as an independent trainer and consultant in intercultural management, diversity & inclusion, and professional mobility. He regularly presents at academic conferences and has authored many articles on these topics and co-authored book chapters and two books. He co-designed the *Toolbox Internationalization* within the 4 TU's cooperation scheme.

PANELLISTS

ED HEERSCHAP

My name is Ed Heerschap and I am on a mission. Together with every early adopter possible I am creating a more inclusive ecosystem, in which every talent can thrive! That is what our Living In program envisions. By understanding the needs of internationals and catering to those needs we support your intention to build a real future in The Netherlands. We are in this together, so the main guiding principle is to work as closely together with my target audience as I can. And I invite each and everyone to do the same! Together we change the game, feel free to join!

ELISABETTA PERI

Elisabetta Peri is an assistant professor in the Signal Processing System group (Electrical Engineering Department) and member of the Biomedical Diagnostic Lab of the Eindhoven University of Technology. Her research focuses on biomedical signal processing, with specific interest on electrophysiological signals for neuromuscular, respiratory and cardiac investigations. The ultimate aim of her research is to use advanced signal processing methods to enable non-obtrusive patient monitoring through electrophysiological signals and sweat sensing. She received her Master of Science in Biomedical Engineering at Politecnico di Milano (Milan, Italy) in 2013. In 2017 she obtained a doctoral degree in bioengineering at Politecnico di Milano with a thesis aimed at quantifying possible neural correlates of functional recovery for patients with congenital (cerebral palsy) or acquired (stroke, brain tumor, Parkinson's disease) brain injuries. Elisabetta is also Board member of the [WISE Network](#)

JASSIBE GUTIÉRREZ

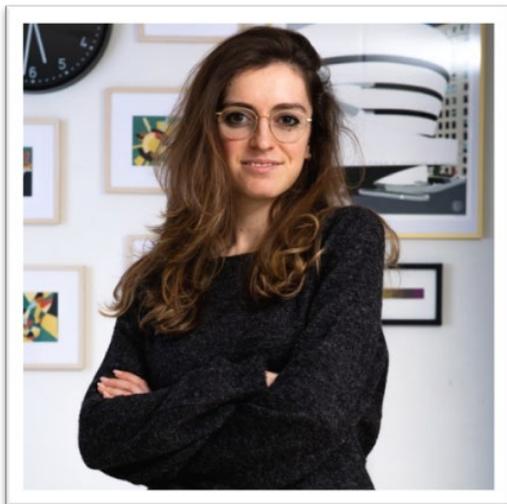

My name is Jassibe Gutiérrez, currently a Project Manager Global Business Adoption in the Customer Support department at ASML. I have been working for ASML for 6,5 years in various project management roles and collaborating closely with our teams across the world. My previous experience has been working in the US for global companies before moving to France and Spain to pursue an MBA. I was born in Mexico and raised in California. I have lived in two European countries before the Netherlands and I have first-hand experience in cultural change and the importance of adaptation. I'm happy to share my experiences and how each has helped and shaped me.

ANA XAMBRE PEREIRA

Ana Xambre Pereira is a TU/e Innovation Sciences student, TINT event organiser and a TGD member from the sunny country of Portugal. In the past 5 years, living in Eindhoven, she has been involved in the student community working on several projects for more student well-being, sustainability, internationalisation, diversity & inclusion. Before a career change to pursue the dream of global sustainability, she worked as a Biomedical Scientist in Portugal, Finland and the United Kingdom so she is experienced in moving around and integrating multicultural environments.

MODERATOR: CHIARA TREGLIA

Chiara Treglia is Lead Facilitator and Strategist at her company tini studio. In her role, she combines her expertise in Design Thinking and coaching to create toolkits and facilitate teams through complex organisational change. When asked: "How do we become more inclusive and sustainable as an organisation?", she encourages clients to find a path that works for them and that will lead them to success. Next to her company, she recently joined innovation Space as Education Designer.
