MedTech Day 2023

An integrated approach for
future-proof healthcare

Dr. Ir. Jonna van der Stam - Catharina Hospital Eindhoven

With a background in Medical Engineering she completed her PhD, focusing on applications of novel prognostic markers in clinical care at the clinical laboratory of the Catharina Hospital and computational biology group at Eindhoven University of Technology. Where the datatypes she explored ranged from blood and urine patient samples to continuous wearable sensors both in low and high care settings. Since then she continues to work on the collection and analysis of scientific clinical data at the Catharina Hospital with the aim to bring innovations in novel data sources and clinical data science closer to routine clinical practice.
