

**Project title: Design Your CBL**

**Period:** 2020 - 2022

**Funded by:** CEE

**Researchers:** dr. R. Taconis, dr. R. Kamp, prof. dr. T. Bekker

**Abstract:** With the introduction of CBL for curriculum renewal in TU/e, it has become important to support teachers in designing CBL learning activities. This project involves designing a design support tool for deepening design and reflecting on design of CBL. This can be used for teacher professionalization.

The design of the project is design research (research through design). This means that in parallel to the design research, the design architecture of CBL projects in terms of critical components and design rules for their composition to produce certain learning outcomes in terms of skills, knowledge development and professional identity will be investigated.
