

Dr. Dury Bayram Jacobs

Project title:	Towards achieving a shared aim: Education for Global Citizenship and Sustainable Development by Using Socio-scientific Issues in Science Education
Period:	May 2020 – January 2022
Grant:	NWO Science Diplomacy Fund
Project leader:	Dr. Dury Bayram Jacobs (TU/e)
Research Team	Prof. dr. Birgit Pepin
Consortium	<ul style="list-style-type: none">• Eindhoven University of Technology, The Netherlands• Bogazici University, Turkey (Dr. Sevil Akaygun; Prof.dr. Emine Adadan; Dr. Ebru Mugaloglu; Dr. Gaye Defne Ceyhan MacLellan)• Radboud University, The Netherlands (Prof. dr. Erik Barendsen)

This proposal for Science Diplomacy Fund (SDF) is about promoting education for global citizenship (GC) and sustainable development (SD) in secondary and higher education (e.g. teacher training programmes) through encouraging socio-scientific issues (SSI) in science lessons.

The project aims to share the experiences of good practices and existing materials on SSI concerning GC & SD, for improving stakeholders' knowledge and skills on this issue. It will build capacity in organisations by developing a competency framework for competencies that are promoted by the SSI materials. The workshop will provide Turkish and Dutch teams with the opportunity of sharing experiences and developing ideas for further collaboration. A seminar that will be given to a diverse group of stakeholders, pre/in-service teachers/educators, researchers will help them develop ideas about integrating SSI towards Global Citizenship in their practices.
